- May be used as a crack/crevice or spot treatment in non-food handling areas of food establishments. In food handling areas may be applied as a crack/crevice treatment only

Product Replaces:

- Tempo WP
- Tempo Ultra WP
- Demon WP
- Cynoff WP

Product Application Tips:

- Use spraying equipment with a min. 50 Micron mesh screen or larger
- **Proper mixing is critical to product performance:**
 - Shake canister well before using
 - Fill ½ of tank with water
 - Add EcoPCO WP•X and mix well to create a slurry
 - Allow 2 minutes for complete wetting of powder
 - Mix/stir/shake well again
 - Finish filling tank with water and mix well again
- Constant agitation is recommended during use
- Re-agitate tank mix if left standing more than 30 minutes
- Test on dark, porous surfaces before applying (for possible white residue)
- Recommended dilution rate is 3 scoops/gallon for most applications
- Clean/rinse equipment daily

Troubleshooting Guide

Problem:

Not effective

Possible Causes/Solutions:

- Thoroughly shake the bottle/application device before using
- Thoroughly mix dilution as outlined in the application tips section above
- Maintain constant agitation, or re-agitate the tank mix if left standing

Lingering fragrance

- Explain to customer fragrance from natural plant oils (not harmful)
- Avoid applications to damp areas
- Overspray the area with Febreze®* (odor eliminator)

EcoPCO Products: Wettable Powder

Troubleshooting Guide

Problem:	Possible Causes/Solution
Possible staining / white residue	<ul style="list-style-type: none">• As with any wettable powders, EcoPCO WP•X may cause “staining” (white residue) of porous dark surfaces such as cedar siding• It is recommended to test a small inconspicuous area first if in doubt• Thoroughly mix dilution as outlined in the application tips section above• If possible maintain constant agitation, or re-agitate the tank mix if left standing. White residue can be removed by scrubbing area with warm soapy water, or by pressure washing area
Clogged sprayer	<ul style="list-style-type: none">• Spray equipment should be thoroughly cleaned and rinsed daily. Do not mix with other chemicals• Replace all screens with 50 mesh or larger screens• Thoroughly mix dilution as outlined in the applications tips section above• If possible maintain constant agitation, or re-agitate the tank mix if left standing every hour

Notes:
