Dräger X-plore® 6300

The Dräger X-plore® 6300 is the efficient yet low-cost full face breathing mask intended for price-conscious users not wishing to compromise on comfort or quality. This full face mask is the successor to the Panorama Nova Standard, a mask which has proven itself over decades of use worldwide – redesigned and improved with fresh colours and an integrated bar code.

The Dräger X-plore® 6300 is designed for use by professionals in industry, and meets the highest demands for reliability, fit and comfort. Together with the respiratory filters from Dräger's comprehensive range, it has proven suitable for a wide range of different applications. Versatile in use, this mask can be used either in combination with Dräger X-plore® Rd40 filters or together with the Dräger powered air purifying respirators (e.g. X-plore® 7300 or 7500 series).

The mask body, which is made of robust and hypoallergenic EPDM, features a double-layer face seal with triple sealing action for a secure and comfortable fit on just about any shape of face. The mask comes in a universal "one size fits all", making logistics and storage easy. The comfortable five-point head harness not only ensures that the mask can be donned easily and quickly, but is wide enough to prevent any pressure points on the wearer's head.

The scratch-proof and distortion-free PMMA Plexiglas visor with 180° wide-angle guarantees a large field of vision with panoramic view. The robust frame is made of extra-light plastic, and the intelligent ventilation system ensures that the visor remains fog-free.

A barcode inside the mask makes checking inventories and carrying out mask maintenance easy. Valves can even be serviced without tools. A full range of accessories and spare parts are available. High quality materials and careful workmanship ensure mask longevity, making the masks highly cost effective.

TECHNICAL DATA

Mask body	Highly resistant and hypoallergenic EPDM
Visor	Scratch-proof PMMA (Plexiglas) with 180° wide-angle
Connector	Sturdy plastic with inhalation and exhalation valve, standard thread connection Rd 40x1/7" as per EN 148-1
Weight	Approx. 500 g
Tested and approved	EN 136 Class 2 (CE mark), NIOSH, AS/NZS
