

Care. Protection. Quality.

*New for 2023, Degesch America introduces our Port-to-Port Pest Free Pledge™.*

*Select customers may qualify for our exclusive Port-to-Port Pest Free Pledge™ on our premium MV fumigation service.*

*We stand behind our vessel fumigation service!*

*Qualifying fumigations must be performed in accordance with the current APHIS FGIS in-transit fumigation standards and all fumigation related instructions must be followed by the crew. If a live infestation of a stored commodity pest species native to the origin is documented in the treated cargo prior to discharge at destination by applicable authorities or third-party inspector, we will assist you by utilizing our global network to investigate the issue and work directly with the regulatory agencies to confirm the potential infestation. If at the end of the investigation additional fumigation is deemed necessary, we will reimburse you for an amount up to the cost of the original fumigation. Reimbursement amount may be handled via credit memo to be applied to future service.*
