6

Dispose of the deactivated fumigants legally according to local regulations.

5

Store the degassed fumigants as described in the instructions for deactivation in either a deactivation basket or a deactivation drum. This must be done outdoors.

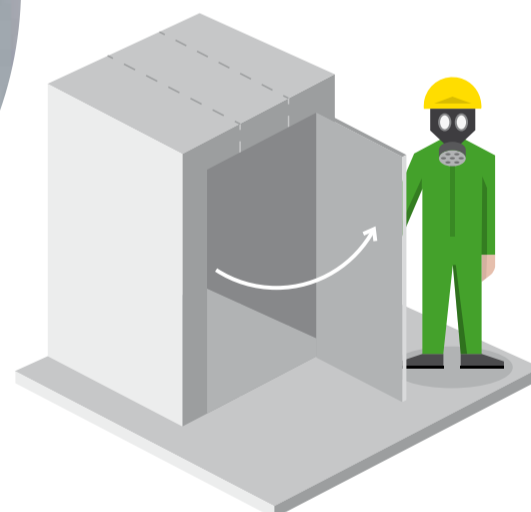

1

Carefully read the provided instructions. Obey all local regulations.

2

Approved respiratory protection equipment and first aid kit should be readily available.

3

Open the container while wearing a gas mask. Follow indicated aeration time on the label or aerate until the concentration is below the threshold limit value (0.1 ppm) before entering.

4

Collect the degassed fumigants in well ventilated container.
